for the purpose of Irrigation use  
under Permit 16488 of the Board and that the right to the use of this water has been perfected

priority of this right dates from June 9, 1972 and that the amount of water to which  
this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated

is necessary to meet water quality objectives in water quality control plans  
which have been or hereafter may be established or modified pursuant to  
Division 7 of the Water Code. No action will be taken pursuant to this  
paragraph unless the Board finds that (1) adequate waste discharge requirements  
have been prescribed and are in effect with respect to all waste discharges  
which have any substantial effect upon water quality in the area involved, and  
(2) the water quality objectives cannot be achieved solely through the control  
of waste discharges.

*Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.*

*Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.*

*This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to minimizing waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.*

*Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.*

*The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.*
